# Application No. Applicant(s) 10/747.612 MCCOPPIN ET AL Office Action Summary Examiner Art Unit Ed Baird 3695 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on 20 August 2010. 2a) ☐ This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1-5 and 7-25 is/are pending in the application. 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration. 5) Claim(s) \_\_\_\_\_ is/are allowed. 6) Claim(s) 1-5 and 7-25 is/are rejected. 7) Claim(s) \_\_\_\_\_ is/are objected to. 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are; a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abevance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some \* c) None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). \* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 3695

#### DETAILED ACTION

#### Continued Examination Under 37 CFR 1 114

 A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09 August 2010 has been entered.

#### Status of Claims

Applicant has amended claims 1-3, 7, 11, and 13-25. Claim 6 has been canceled.
 Claim 26 had been added in Applicant's submission of 09 August 2010 and was subsequently canceled in the submission of 20 August 2010. Thus, claims 1-5 and 7-25 remain pending and are presented for examination.

#### Response to Arguments

- Applicant's remarks/ arguments and amendments filed 20 August 2010 (supplemental
  amendment) have been fully considered. Applicant's remarks/ arguments and amendments
  filed on 09 August 2010 have been entered but are mute in view of the supplemental
  amendment.
- 4. Examiner acknowledges amendments to claims 1, 13 and 25 to overcome 35 U.S.C. § 112, 1<sup>st</sup> and 2<sup>nd</sup> paragraph rejections. However, amendments do not overcome rejections in as much as "ensuring against any deficiencies in the self-funding" is not enabled 112, 1<sup>st</sup> paragraph, and is vague and indefinite 112, 2<sup>nd</sup> paragraph. See revised rejections below.
- Applicant's arguments filed with respect to claims 1-5 and 7-25 regarding the 35
   U.S.C. § 103(a) rejections. However, Examiner notes that no specific arguments have been

Page 3

Application/Control Number: 10/747,612

Art Unit: 3695

made showing why the prior art does not teach the claim limitations, nor how the amendments indicated any allowable features. Applicant merely states that the prior art does not teach the claimed limitations of the independent claims. Accordingly, arguments are not persuasive. Examiner will analyze the claims in light of the amended claim language.

#### Claim Rejections - 35 USC § 112

- 6. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 7. Claims 1-5 and 7-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.
- 8. Regarding claims 1, 13 and 25, Applicant uses the term "said guaranteed transaction self-funding ensuring against any deficiencies in the self-funding". The specification does not indicate what the deficiencies in self-funding are, and how to ensure against any deficiencies in the self-funding.

Also, the exemplary limitation of claim 1:

 wherein any deficiencies in said self-funding- of the foreign financial transaction payment are prevented by domestic settlement funds transfer system insurance procedures of a central banking authority that controls the domestic settlement funds transfer system.

is not enabled as much as the specification does not describe all deficiencies as indicated by the term "any" deficiency.

Page 4

Application/Control Number: 10/747,612

Art Unit: 3695

 Claims 2-5, 7-12 and 14-24 are rejected by way of dependency on a rejected independent claim.

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 11. Claim 1-5 and 7-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 12. Regarding claims 1, 13 and 25, the phrases "guaranteed transaction self-funding" and "said guaranteed transaction self-funding ensuring against any deficiencies in the self-funding is vague and indefinite. Examiner does not understand what the deficiencies in the self-funding are, or how to prevent them. Examiner interprets "said guaranteed transaction self-funding ensuring against any deficiencies in the self-funding" as merely a further definition of the word guaranteed and is not adding any substantial subject matter.

For purposes of examination, the phrase "provides guaranteed transaction self-funding of the foreign financial transaction payment to the Receiver Financial Institution, said guaranteed transaction self-funding ensuring against any deficiencies in the self-funding" will be interpreted as "provides <u>a quarantee</u> of the foreign financial transaction payment to the Receiver Financial Institution". Appropriate correction is required.

- 13. Regarding claims 1, 13 and 25, in the exemplary limitation of claim 1:
  - wherein any deficiencies in said self-funding of the foreign financial transaction payment are prevented by domestic settlement funds transfer system insurance procedures of a central banking authority that controls the domestic settlement funds transfer system.

the term "any" deficiency is vague and indefinite. The term "any deficiency" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

For purposes of examination, the limitation will be interpreted as not further limiting. Appropriate correction is required.

 Claims 2-5, 7-12 and 14-24 are rejected by way of dependency on a rejected independent claim.

### Claim Rejections - 35 USC § 103

- 15. The rejections below are made in light of the 112, 2<sup>txt</sup> paragraph rejections above.
- 16. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

- Claims 1-3, 5, 7-15, and 17-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lawrence (US Pub. No. 2003/0233319) in view of Barbara et al (US Pub. No. 2003/0105710).
- Regarding claims 1 and 13, Lawrence teaches:
  - receiving, in one or more computer processors at a Receiver Financial Institution, a
    single authorizing foreign financial transaction payment instruction from a Client
    Bank over a computer network [see at least 0065 and Figure 2]
    in a format associated with a domestic settlement funds transfer system used for
    funding domestic credit transfer transactions that provides guaranteed transaction

Art Unit: 3695

self-funding of the foreign financial transaction payment to the Receiver Financial Institution, said guaranteed transaction self-funding [sic] ensuring against any deficiencies in the self-funding - [see at least Abstract, 0022-0024, and Figure 1]. Examiner interprets financial institution as including Applicant's Client Bank and Receiver Financial Institution. Examiner notes that these financial institutions include "any insured bank"; thus "any insured bank" is indicative of Applicant's guaranteeing transactions;

- - wherein said analyzing comprises identifying any necessary intermediary and processing financial institutions required to process the foreign financial transaction payment to the foreign financial transaction beneficiary [0032]; and
- responsive to said analyzing, generating, in the one or more computer processors, foreign financial transaction payment instructions for at least one financial institution located in the foreign country and transmitting the foreign financial transaction payment instructions over the computer network [see at least 0078 and Figure 5], the foreign financial transaction payment instructions including data in a funds transfer messaging service format that is compatible with both the Receiver Financial Institution and the at least one financial institution [see at least 0031 and 0033].

Art Unit: 3695

Examiner notes that *financial institutions* [0024] include foreign banks and foreign financial agencies as claimed by the Applicant.

Lawrence does not explicitly disclose:

wherein said guaranteed, self-funding [sic] of the foreign financial transaction
payment comprises both the Receiver Financial Institution and the Client Bank being
members of the domestic settlement funds transfer system in which said members
are required to: (1) have funds for the foreign financial transaction payment available
in the domestic settlement funds transfer system, and (2) settle transactions daily
initiated using the domestic settlement funds transfer system.

However, **Barbara** teaches a method and system for on-line payments which enables the making of payments using any of a credit card or a checking account or savings account to facilitate an on-line transaction [0006]. She further discloses *funds transfer capability* which allows a customer at a terminal to use the customer's transaction account to transfer funds, for example, between *eligible accounts* [0031]. In addition, the customer can use the transaction account to transfer funds, for example, via selection of a *self-fund mechanism* which will provided an instant *availability of funds* [id.]. This also enables the customer to move money from the customer's checking account in one bank to the customer's checking account *in a different bank* [0139]. In turn, the customer can use one account as collateral to ensure there are funds available in another account [id.]. Examiner notes that this *self-funding mechanism* is analogous to Applicant's *self-funding of the transaction* in that different accounts in different banks are used as back-up to ensure an available of funds.

Therefore, it would have been obvious to one having ordinary skill in the art at the time of the instant invention to modify Lawrence's disclosure to include a self-funding mechanism as taught by Barbara because a user can use one account as collateral to ensure that there are

Art Unit: 3695

funds available in another account even when the accounts are in different banks [Barbara 0031 and 0139].

Examiner notes that the use of a domestic settlement funds transfer system and settling transactions daily are merely statements of intended use and are not given patentable weight. A recitation of intended use or purpose of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use or fulfilling said purpose, then it meets the claim. (See also MPEP § 2111.04).

### Regarding claims 2 and 14, Lawrence teaches:

- wherein the settlement funds transfer system comprises a U.S. Federal Reserve
   Bank funds transfer system that carries out domestic funds transfers [see at least 0029],
- wherein the (single authorizing) foreign financial transaction payment instructions
  cause both an automatic credit and an automatic debit of associated accounts to be
  made upon receipt [see at least 0041 and 0042].

### Regarding claims 3 and 15, Lawrence teaches:

• wherein the funds transfer messaging service format that is compatible with both the Receiver Financial Institution and the at least one financial institution is compatible with a world-wide financial messaging network interfaced with the computer network and comprising standardized messaging services and interface software running in the one or more computer processors that initiates international payments [see at least 0002, 0023, and 0029]. Examiner notes that SWIFT ("Society for Worldwide Interbank Financial Telecommunication") is an example of Applicant's world-wide financial messaging network.

Art Unit: 3695

21. Regarding claims 5 and 17, Lawrence teaches the Client Bank as a domestic bank 100241.

## 22. Regarding claims 7 and 19, Lawrence teaches:

 the foreign financial transaction payment instructions are received via a network interface with the domestic settlement funds transfer system, said network interface being configured to provide access to a U.S. Federal Reserve Bank funds transfer system useful for carrying out domestic funds transfers [see at least 0024].

## 23. Regarding claims 8 and 20, Lawrence teaches:

 transmitting the foreign financial transaction payment instructions to the at least one financial institution [see at least 0024].

## 24. Regarding claims 9 and 21, Lawrence teaches:

 the at least one financial institution includes a branch of the Receiver Financial Institution that generated and transmitted the foreign financial transaction payment instructions [see at least 0026 and 0027].

### 25. Regarding claims 10 and 22, Lawrence teaches:

the at least one financial institution includes a member of a non-Federal Reserve
 Bank electronic payments system [see at least 0024].

#### Regarding claim 11, Lawrence teaches:

- the at least one financial institution includes a member of a U.S. Federal Reserve
   Bank funds transfer system that carries out domestic funds transfers [see at least 0023],
- wherein the foreign financial transaction payment instructions cause both an
  automatic credit and an automatic debit of associated accounts to be made upon receipt
  thereof receipt [see at least 0041 and 0042].

#### Regarding claims 12 and 24. Lawrence teaches:

Art Unit: 3695

the at least one financial institution includes a correspondent bank that is connected
to the Receiver Financial Institution that generated and transmitted the foreign financial
transaction payment instructions via a world-wide financial messaging network [see at
least 0023 and 0029]

- the world-wide financial messaging network comprises standardized messaging services and interface software (running in at least one processor that initiates - claim
   24) used to initiate international payments [see at least 0067-0069].
- the correspondent bank handling business in a particular geographic area [see at least 0002, 0051 and 0059].
- 28. Regarding claims 18, Lawrence teaches
  - the single authorizing foreign payment instruction received from the client bank cause both an automatic credit and an automatic debit of associated accounts to be made upon receipt thereof [see at least 0041 and 0042].
- Regarding claim 23, Lawrence teaches:
  - the at least one financial institution includes a member of a U.S. Federal Reserve
     Bank funds transfer system that carries out domestic funds transfers [see at least 0023],
- 30. Claims 4 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lawrence in view of Barbara and in further view of SWIFT.com ("MT 103 migration – a success for the whole community", home page stories archive 2003, posted 11/21/2003).
- Regarding claims 4 and 16, Lawrence and Barbara teaches all the items of claims 2 and 14, the claims upon which these claims depend, respectively, but do not teach foreign

financial transaction payment instructions which comply with SWIFT MT 103 specifications (i.e. messaging standards).

However, SWIFT.com teaches about foreign financial transaction payment instructions which comply with SWIFT MT 103 messaging standards. SWIFT.com discloses "The weekend of 15-16 November saw two significant events in SWIFT's history. The first was the removal of the MT 100, SWIFT's most-used message, from the network. To enable this to happen, migration to the MT 103 needed a successful completion and this was achieved with a 98% migration rate on the last working day before the deadline", [2<sup>nd</sup> paragraph].

Therefore, it would have been obvious to a person having an ordinary skill in the art at the time of the instant invention to modify Lawrence's disclosure to include SWIFT MT 103 specifications as disclosed by SWIFT.com because its use would increase certainty, transparency, and automation (STP) of customer transfers as well as reduced cost, reduced risk, and conform to worldwide regulatory requirements.

- Claim 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lawrence in view of Barbara in further view of Official Notice.
- 33. Claim 25 is substantially similar to claims 1 and 13 with added limitations. Lawrence also teaches:
  - ensuring compliance of the funds transfer instructions with one or more government requirements [see at least 0026 and 0050]. Examiner interprets regulatory requirements as analogous to Applicant's government requirements.
  - if the funds transfer instructions are compliant with the one or more government requirements [0050], ensuring, via the computer system, that any required data fields in

Application/Control Number: 10/747,612

Art Unit: 3695

the funds transfer instructions meet all data requirements of the settlement funds transfer system (see at least 0026 and 0030).

Lawrence does not explicitly disclose:

 if the funds transfer instructions meet said data requirements, crediting an account of the client bank established for foreign payments with an amount associated with the funds transfer instructions:

However, **Barbara** teaches crediting an account of the client bank to a foreign bank with the funds transfer instructions [see at least 0093 and 0139].

Therefore, it would have been obvious to one having ordinary skill in the art at the time of the instant invention to modify **Lawrence's** disclosure to include *crediting an account of the client bank to a foreign bank* as taught by **Barbara** because a customer can use the system to make person-to-person payments to other recipients in different countries [**Barbara** 0093].

Neither Lawrence nor Barbara explicitly discloses:

- ending processing of the funds transfer instructions [sic] when funds transfer instructions are not compliant with government requirements, and
- ending processing of the funds transfer instructions [sic] and generating an error message if data requirements are not met.

However, Examiner takes **Official Notice** that one having ordinary skill in that art at the time of the instant invention would end processing a funds transfer when funds transfer instructions are not compliant with government because otherwise the transfer would be in violation of government requirements.

Examiner takes Official Notice that one having ordinary skill in that art at the time of the instant invention would end processing a funds transfer and generate an error message when data requirements are not met because the transfer process can not be performed properly.

Art Unit: 3695

Conclusion

The prior art of record and not relied upon is considered pertinent to Applicant's

disclosure:

Kleckner et al: "Method and apparatus for automating the process of settling

financial transactions", (US Pub. No. 2002/0174066).

Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Ed Baird whose telephone number is (571)270-3330. The examiner can

normally be reached on Monday - Thursday 7:30 am - 5:00 pm Eastern Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Charles R. Kyle can be reached on 571-272-6746. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private

PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you
